

NeoPro5

The Neo Pro 5i is an excellent high sensitivity pure ribbon tweeter for high end home theatre and music speaker system applications. The Neo Pro 5i Ribbon tweeter applications include Low to medium power High End class A Transistor /FET or Valve amplifiers using high efficiency Woofer /Tweeter speaker combinations. Thus enabling Triode/Pentode valve amplifiers with only a few watts of output power to reach incredible sound pressure levels with very low harmonic distortion. Due to the high power handling capabilities of the new Alloy sandwich diaphragm the Neo Pro 5i Ribbon tweeter can also be used for High End Studio or High power PA monitor speaker systems requiring the extra detail and distortion free sound and transient dynamics of a ribbon tweeter. The Neo Pro 5i is a true pure ribbon tweeter with incredible dynamics ,sound stage ,depth of field, midrange detail, and shimmering top end to kill for.
